

U700 Universal Wifi Router 300M HIGH GAIN ROUTER

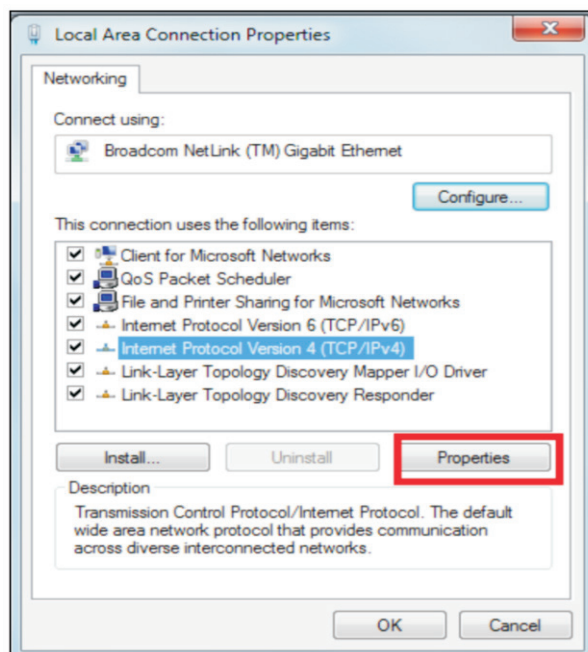

1. PC Postavke (Windows 7)

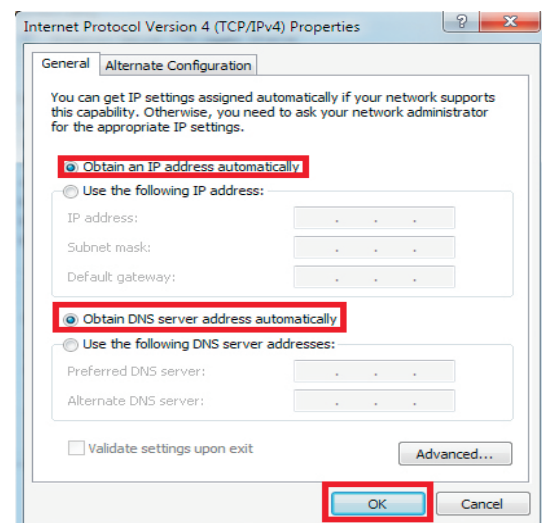

1) Idite na start > control panel > network and internet > network and sharing center > change adapter settings > local area connection te izaberite network card, zatim desni klik na "Local area connection", izaberite properties

2) Izaberite Internet protocol version 4 (TCP/IPv4, kliknite na properties)

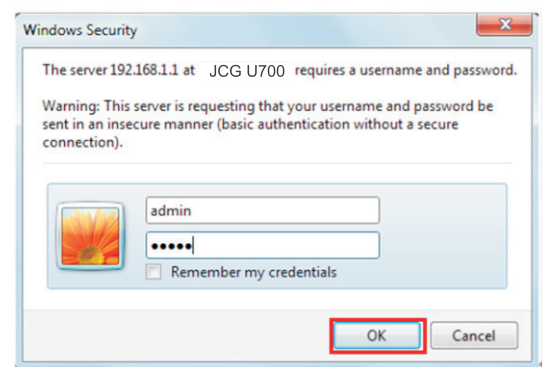

3) Izaberite Obtain an IP address automatically, Obtain DNS server address automatically, potvrdite sa OK, vratite se na predhodni MENU i potvrdite sa OK.

2. Router postavke (Windows 7)

1. Otvorite browser, unesite http://192.168.1.1 te kliknite na GO
2. Unesite username i password u prostor za login. Tvorničke postavke za username i password su "admin"

Potvrdite sa OK

3. Pojavit će se postavke routera

4. Unesite ime mreže SSID i lozinku

Service Set Identifier (SSID): JCG-000014
Pre-Shared Key: 0k0k0k0k

5. WAN postavke

Metoda 1: Automatski (DHCP)

WAN Connection Type: ☐ Fixed IP ☒ Auto Config (DHCP) ☐ PPPoE Dial-up
Host Name: JCG-000013
Clone MAC Address: 00:00:00:00:00:00

Metoda 2: Fiksna IP adresa

Ako ste odabrali fiksnu IP adresu, pojavit će se postavke za statičku IP adresu koje trebate unijeti: IP address, Subnet mask Default gateway i DNS

WAN Connection Type: ☒ Fixed IP ☐ Auto Config (DHCP) ☐ PPPoE Dial-up
IP Address: 172.1.1.1
Subnet Mask: 255.255.255.0
Default Gateway: 172.1.1.254
Domain Name Server (DNS): 0.0.0.0
Clone MAC Address: 00:00:00:00:00:00

Metoda 3: PPPoE konekcija

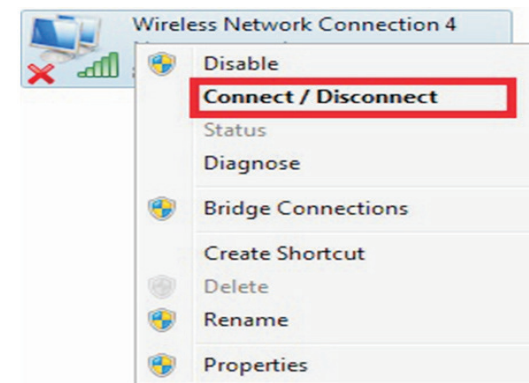

Ako koristite PPPoE konekciju, pojavit će se PPPoE postavke koje trebate unijeti (username i password vašeg IPS-a)

WAN Connection Type: ☐ Fixed IP ☐ Auto Config (DHCP) ☒ PPPoE Dial-up
User Name: pppuser
Password: *****
Clone MAC Address: 00:00:00:00:00:00

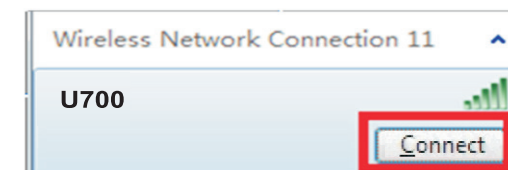

Izaberite Vašu najbolju WAN konekciju i kliknite na "save/apply"

3. Wireless konekcija

1) Idite na start > control panel > network and internet > network and sharing center > change adapter settings > wireless network connection, zatim desni klik na "Wireless network connection", izaberite "Connect/disconnect"

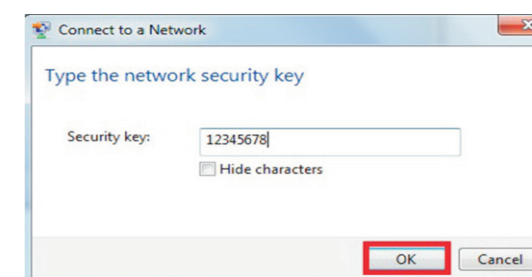

2. Izaberite wireless network name (SSID) u listi konekcija te kliknite na "Connect"

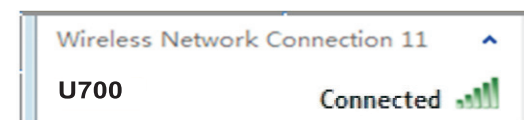

3. Unesite wifi ključ i kliknite na "OK"

Napomena: na tvorničkim postavkama uređaja SSID i Network key se nalaze na donjoj strani uređaja

4. Konekcija je uspješna

4. FAQs

Kako resetirati uređaj na tvorničke postavke?

a) Držite pritisnutu tipku RESET 5-10 sekundi (uređaj mora biti uključen)

Laptop ne može da nađe wifi signal
